

MICRONEEDLING

PRE-CARE INSTRUCTIONS

- If you are prone to herpes simplex outbreaks (cold-sores), please notify your provider prior to your treatment to ensure you start on prophylactic antiviral therapy (recommended to start the day before treatment and continue for a total of 5 days).
- If your face or treatment area has irritated skin, such as active sunburn, open wounds, acne, or sores the days preceding your appointment, please contact our office as we may need to postpone your treatment.
- Microneedling may NOT be performed over active outbreaks or open lesions.
- Wait at least 6 months post-ACUTANE use before microneedling treatments.
- Avoid sun exposure for 24 pre and post-procedure.
- Discontinue use of topical retinol, alpha hydroxy acids products 3 days prior to procedure.
