

# KYBELLA

## PRE-CARE INSTRUCTIONS

- Ensure you schedule your treatment at least 2 weeks prior to any special events to allow time for possible bruising, swelling, and/or redness to subside.
- Inform us if you have a history of difficulty swallowing, medication allergies, a history of anaphylaxis, or other chronic medical problems.
- Take over-the-counter antihistamine such as Zyrtec or Claritin 1 hour prior to your appointment to help minimize post-procedural swelling.
